

Quality Policy

Quality Policy Statement Rev 5 2023-01-18.docx

Traffix Group is a leading traffic engineering and transport planning consultancy. The company is highly regarded for providing practical and effective traffic engineering solutions to complex traffic and transport problems. We work in partnership with private sector clients as well as State and Local Government, on projects ranging from small residential or commercial developments to multi-billion dollar infrastructure projects.

Traffix Group's leadership team is committed to providing high levels of service quality and client satisfaction.

To achieve these goals, we will:

- Provide adequate resources to develop and maintain an effective Integrated Management System to implement and support this policy.
- Establish quality objectives and monitor progress against the objectives.
- Communicate and consult with employees on quality issues.
- Train and inform our employees regarding quality issues applicable to their work activities.
- Encourage employees to actively contribute to the continuous improvement of the company's quality performance.
- Monitor our quality performance to continually improve outcomes.
- Review our HSE performance, objectives, procedures and policies (at least annually or when legislation changes occur).

Our company's solid reputation is built on providing high quality traffic engineering and transport planning advice to our clients.

Adopted by the Traffix Group Pty Ltd Board on 27 September 2023.
